

Protective Screen

2 Structuring the Room

Customized Acoustic Solutions

Product

The workstation **protective screens** can be used to screen individual workstations or entire room zones safely and with high design quality. Made of toughened safety glass (ESG), the protective screens have a high-quality finish and are equipped with fine bevelled edges and rounded safety corners. They are offered not only as table top and back table elements, but also as cabinet and counter tops as well as suspended safety shields for free ceiling suspension. To increase safety and as a design element, a partial satin finish is recommended depending on the positioning. Screens can be freely positioned close to the table frame without any problems and without any risk of tripping.

Protective screen

Security & personal protection

The workstation **protective screens** can be used to screen individual workstations or entire room zones safely and with high design quality. Made of toughened safety glass (ESG), the protective screens have a high-quality finish and are equipped with fine beveled edges and rounded safety corners. They are offered not only as table top and back table elements, but also as cabinet and counter tops as well as suspended safety shields for free ceiling suspension. To increase safety and as a design element, a partial satin finish is recommended depending on the positioning. Screens can be freely positioned close to the table frame without any problems and without any risk of tripping.

Acoustic screens in combination with glass topper are also ideally suited as protective screens, as are movable screens in partial or full glazing.

The **Prime Line** and **Silence Line** series offer a wide range of equipment variants, including the upgrading of table elements and movable wall elements with all-glass panels to increase the screening effect while maintaining the desired visual axes in the room. Acoustics and safety go hand in hand, so to speak, and can thus be designed very efficiently. Particularly for room situations that require a high protective screen, the movable wall systems with their glazing enclosed in the frame are ideally suited.

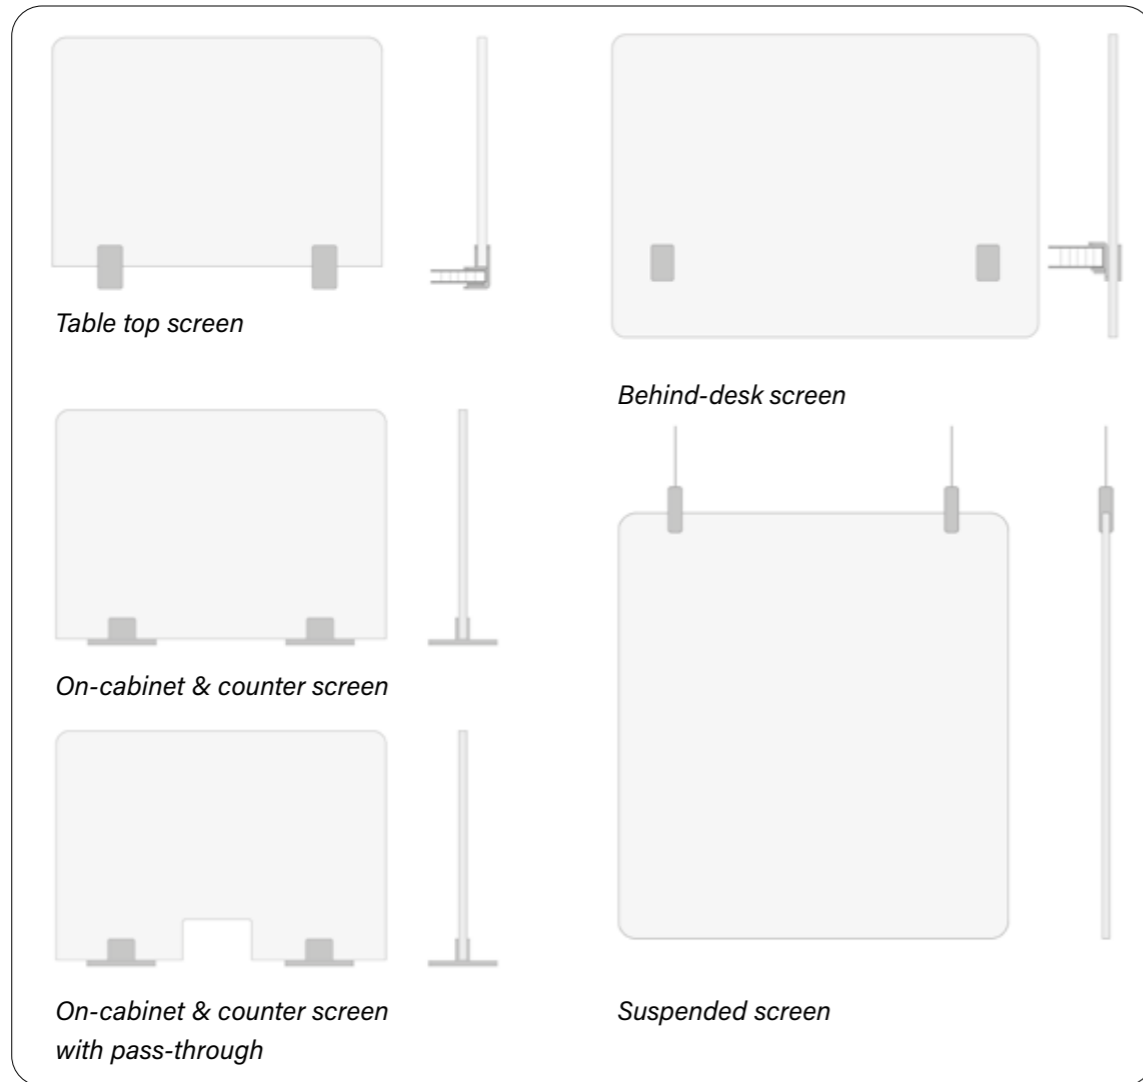

*T-combination
with glass topper*

*Top: Prime Line 55 table element with glass topper
