

MOOD LINE 55/40

Cosy-soft, elegant and full of character

It is the small details that make the difference, that lend a product a very personal note. When this is implemented with a great deal of specialist expertise and individual craftsmanship, products are created which are impressive for more than just their functional qualities. The partition system Mood Line is available as a solitary wall (55 mm and 40 mm without connection) and in the wall thickness of 55 mm as system wall, equipped with invisible magnetic connection. The walls are available in 15 different fabric qualities - divided into 5 price groups. Further creative freedom is provided by 6 different quilted fabrics with a choice of more than 200 colours.

Renewable and 100% sustainable

Alongside the classic acoustic filler materials – a flame-retardant polyester fleece – Mood Line partitions are also available with a filling made of 100-percent pure new sheep's wool. Sheep's wool not only boasts outstanding acoustic properties, but also has the unique ability to filter the air in the room and lastingly neutralize it. Sheep's wool is a renewable raw material and is environmentally friendly and recyclable, and is therefore 100-percent sustainable.

Data Mood Line

High-quality and flexible organisation

For the necessary order and efficient organization at the workplace, Mood Line offers a comprehensive range of organizational accessories, made of high-quality steel. Easily playable and changeable at any time, filing boards or note boxes, to name only two, are hung on the wall elements. Available in two heights, the carrying handles ensure correct positioning and can be replaced if required. The powder-coated organization accessories are available in RAL shades anthracite gray RAL 7016 and white aluminium RAL 9006. The organizational accessories are extensive, from the A4 sheet tray to the pen tray, card and utensil box, (round and square) to the coat hook, test tube holder and a handy brochure and magazine loop.
