

Silence Point

Silence Point is a versatile product family with the best acoustic properties, developed and optimized over many years. The modular system is broad and ranges from the classic museum bench to various sofa variants to the complete work island with or without a roof. Integrated LED lights and individually configurable electrification modules make the system independent of the office infrastructure.

Depending on the type selected, the models are available as one, two or three-seaters and, depending on the width and height, also in a mobile version, equipped with large and smooth-running universal castors. There are 9 fabric collections to choose from, from classic polyester to new wool fabrics such as Passion with a beautifully textured wool weave. This makes the Silence Point models a favorite spot with an unmistakable appearance. Sitting comfort, durability and ergonomic equipment, with invitingly soft back cushions, are geared towards the requirements of everyday office life and its surroundings. The lovingly fully upholstered walls are offered on one side or optionally on both sides in a quilted version. Quilting options on request. There are 8 fabric collections with different characters and colours available for this purpose.

Model dependent: Supplied disassembled into individual ceiling and wall elements for assembly on site.

Data Silence Point

Wall thickness 40 mm

Substructure - dimensionally stable aluminum frame profile

*SP WorkBench H1400 quilting 114 partial
